(fired from 50 m distance and 10 shots)*

SUBSONIC THREE FOR THE HUNT HIGH VELOCITY HOLLOW POINT & FULL POINT

SPECIAL SUBSONIC HUNTING CARTRIDGE

Special hunting cartridge for taking predators during close season, particularly useful for low-noise firing, with good function in single loaders

HIGH VELOCITY HUNTING CARTRIDGE HOLLOW POINT

Special hunting cartridge for short and long ranges, with high impact energy, suited particularly for long ranges with insert barrel

HIGH VELOCITY HUNTING CARTRIDGE FULL POINT

Special hunting cartridge with flat trajectory and terminal efficiency, for short and long ranges, particularly suited for long ranges with insert barrel

THE WAY OF AN AMMUNITION FROM SCHOENEBECK SUCCESS COMPANY

In 1829, the merchants Louis Sellier and Nicolaus Belloc founded a company for making percussion primers. In the 150 years to follow this company developed to a significant producer of ammunition and explosives. LAPUA OY, a Finnish enterprise, bought in 1992 the

ammunition production in Schoenebeck. Under the guidance of the new owner the successful production of subcaliber, hunting and shot ammunition of the traditional SK brand could be further extended. Today, the LAPUA GmbH is one of the most important makers of

subcaliber ammunition. For many years, sport shooters, biathletes and hunters have put their trust in cartridges from Schoenebeck, which are especially known all over the world for their high precision, absolute reliability and perfect quality.

NO COMPROMISES QUALITY BY PRECISION

In combination with optimal checking and testing conditions subcaliber, hunting and shot cartridges from Schoenebeck stand for absolute reliability and highest precision.

Best selected materials and the use of newest technologies, combined with years of experience and professional competence make sure that SK cartridges have perfect quality properties in all areas of sporting and hunt-related shooting.

SPORT SHOOTERS

LAPUA .22 SERVICE CENTER RECOMMEND AMMUNITION TEST

LAPUA GmbH owns a sighting-in center with the worldwide best equipment for testing subcaliber ammunition. Many national and also international marksmen and biathletes have made use of this special opportunity for selecting the ammunition of the SK and LAPUA brands for their handguns and long range weapons.

We offer all sport shooters and biathletes the opportunity of testing our SK and LAPUA brand subcaliber

ammunition. You will have selected ammunition lots of our two product lines at your disposal for tests.

We can serve you with different equipment for fixing your barrels and with the aid of most modern measuring techniques to test successfully – independently of the weather conditions – the ammunition lots in your handguns but also your long range weapons for selecting and defining the optimum ammunition lot, perfectly adjusted to your barrel.

Our Service Team

LAPUA LOW TEMPERATURE CHAMBER .22 SERVICE CENTER

New: our low temperature chamber for your sighting-in down to -7.6°F .

A very special service: testing subcaliber ammunition at temperatures down to -7.6°F all year round, is being offered by LAPUA GmbH in Schoenebeck to the national and also many international biathletes teams by means of a new low temperature chamber. The ammunition lots just tested and selected at room temperature can be re-shot under extreme conditions in this special room.
